As a City of College Station engineer, you'll have the opportunity to coordinate, lead and manage

## CAPITAL PROJECTS in College Station, Texas

The City of College Station takes extreme pride in its infrastructure of streets, parks, water and sanitary sewer lines, and public buildings. Facilities owned and operated by the city include neighborhood fire stations, recreation centers, and a municipal court, library and police station. Going by the numbers in College Station, there are:

- \* *more than 1,305 acres of dedicated park land*
- \* *more than 690 linear miles of water/sanitary sewer mains*
- \* *approximately 286 miles of paved streets*
- \* *42 current capital projects budgeted at \$105 million*

A new 25,000 square foot fire station, roadway extensions, and significant utility rehabilitations are some of the projects currently under way. These and other capital assets significantly enhance the character, growth patterns, and quality of life in College Station. The city continuously modifies, expands, rehabilitates and replaces its infrastructure to meet the needs of residents and visitors in accordance with the comprehensive plan and the city council's strategic initiatives.

The Capital Projects division consists of project managers and land agents who manage, deliver and acquire land (easements, right-of-way, and real property) needed to support improvements. The division has six Texas-licensed professional engineers and the staff is responsible for each project from conceptual design through completion. The division is committed to ensuring that projects are of the highest quality, delivered on schedule, and are within budget.
